

From its headquarters in the foothills of the Swiss Alps, a natural setting of rare purity, La Colline Cellular Research Laboratories has built a reputation for excellence. The **CMAge® Complex** - the secret of thoroughly hydrated, protected and oxygenated skin - is the core ingredient in all of La Colline's anti-aging products.

Every day, the skin is subjected to an onslaught of stress factors (pollution, overwork, fatigue, tobacco...) that threaten its natural balance. The complexion loses its radiance and the skin ages more quickly.

SWISS RIVIERA

Global Anti-Pollution Emulsion

Essential skincare for anyone who lives in an urban environment, **Global Anti-Pollution Emulsion** helps combat the harmful effects of pollution while moisturizing and refreshing the skin.

Its complex formula, the fruit of many years of research, delivers a veritable breath of fresh Swiss mountain air. Its protective, antioxidant and detoxifying action provides all the elements needed to preserve the beauty of the skin.

With this emulsion, La Colline pushes the limits of cutaneous protection by combining the **CMAge® Complex**, which boosts cellular metabolism, with **Cell Impulse**, a blend of Swiss plant extracts coupled with high-performance active ingredients that yields a triple effect:

Protection:

A protective mesh limits the accumulation and penetration of pollution particles. It also reduces the particles' ability to bind to the epidermis, allowing the skin to breathe. The complexion looks brighter with a newfound freshness.

Antioxidation:

Organically grown **Edelweiss**, a Swiss plant that can survive under extreme climatic conditions, and **Artemisia** slow the action of free radicals with their combined antioxidizing power, while **Epilobium** soothes and rebalances the skin.

Shielded from oxidative stress, which leads to premature aging, the skin retains its youthful look.

Detoxification:

Pollutants and toxins are trapped and eliminated, limiting their harmful effects. The complexion looks fresher and clearer.

Protected, bolstered and detoxified, the skin is virtually rejuvenated. Well-hydrated, it emanates freshness and radiance, like after a weekend in the country air. The emulsion's light texture penetrates quickly, imparting a delicate sensation of softness.

Global Anti-Pollution Emulsion is suitable for all skin types and all ages.

Application:

*Apply one or two pump doses of **Global Anti-Pollution Emulsion** to the forehead, cheeks, chin and neck, then smooth in with upward circular motions. Use morning and/or night, preferably after your usual serum. Specially developed to supplement La Colline's other skincare products, **Global Anti-Pollution Emulsion** can be combined with all La Colline serums and creams as part of a complete skincare routine.*

We at La Colline Laboratories thank you for the confidence you have shown in us. To find out more about the performances of the products that are best for your skin, feel free to ask your La Colline beauty consultant for advice.
