Located in the foothills of the Swiss Alps, La Colline Research Laboratories has built a reputation for its technical skills in oxygenation and cell renewal. Its development conforms to stringent requirements and great accuracy, with the exclusive **CMAGE®** as the key element. As the secret to well-moisturized, protected, glowing skin, it is the very essence of La Colline beauty care.

Cellular Hydra Firming Body Cream

As sensitive to the passage of time as the facial skin, the body skin needs specific care to combat the signs of aging.

Cellular Hydra Firming Body Cream has been developed with a smooth and creamy texture to envelop the body skin in a silky veil.

This body-specific formulation contains active ingredients with special properties:

- **Macadamia Oil**, similar to the skin's hydrolipidic film, offering comfort and nutrition.
- A **Hydro-Firming Complex** based on the organic derivatives of silicon, making it possible for the skin to store water, while preventing glycation, a phenomenon that causes skin tissues to become rigid, resulting in aging.
- **Sweet Almond Proteins** with a high molecular weight that form a tightening film that rests on the skin, providing a lifting effect.

Apply generously to the entire body, morning and evening. Massage using ascending circular movements, paying particular attention to certain areas (inner arms, thighs, stomach, etc.).

We at La Colline Laboratories thank you for the confidence you have shown in us. To find out more about the performances of the products that are best for your skin, feel free to ask your La Colline beauty consultant for advice.
